PROFESSIONAL SUMMARY

Final-year B.Tech CSE student with internship experience building Agentic AI pipelines and production-grade MERN applications. Shipped full-stack web apps, AI automation systems, and ML-powered tools using Python, JavaScript, and the MERN stack. Strong CS fundamentals across DSA, OOP, DBMS, OS, and Networks. Seeking roles in Full Stack Development, Backend Engineering, or AI/Automation.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, HTML5, CSS3

Frontend / Backend: React.js, React Native, Node.js, Express.js, Flask, FastAPI

AI / ML: Prompt Engineering, LangChain, LangGraph, RAG, Scikit-learn, Pandas, NumPy, Groq AI, Claude AI

Databases & Tools: MongoDB, MySQL, Git, GitHub, Playwright, Postman, Vercel, Render, Azure

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

INTERNSHIP EXPERIENCE

Agentic AI Intern | Innomatics Research Labs | *Feb 2026 – May 2026* | *Remote*

- Designed and deployed multi-step agentic pipelines with LangChain, LangGraph, and RAG, enabling LLMs to autonomously retrieve, reason over, and act on real-world data.
- Built FastAPI-based AI backends with structured prompt engineering, measurably reducing hallucination rates in agent outputs.

MERN Stack Intern | EY GDS & AICTE | Edunet Foundation | *Dec 2024 – Jan 2025* | *Remote*

- Built a production-ready MERN application end-to-end, React.js UI, Node.js/Express.js REST APIs, and MongoDB schema design, delivered under EY Global Delivery Services mentorship.
- Implemented JWT authentication, component-based architecture, and consistent API error-handling following industry-standard practices.

EDUCATION

B.Tech – Computer Science Engineering | *2023 – 2026 (Pursuing)*

Vaagdevi College of Engineering, Warangal

Diploma – Electronics & Communication Engineering | *2019 – 2023*

Mother Teresa Institute of Science & Technology

PROJECTS

Team Task Manager – MERN Stack | *2026* | [Repo](#)

- Built and deployed a team management platform with JWT auth, role-based access control (Admin/Member), real-time task tracking, and an analytics dashboard, live on Vercel + Render.

Stack: React.js, Node.js, Express.js, MongoDB, JWT, Vercel, Render

CAMX GTM Automation – AI Pipeline | *2026* | [Repo](#)

- Engineered an end-to-end GTM pipeline scraping 100+ CAMX exhibitor profiles via Playwright, auto-enriching company data, and generating personalised AI outreach through Groq AI, eliminating manual prospecting entirely.

Stack: Python, Playwright, Groq AI, Google Sheets API

RadiantSkincare – AI Skin Detection App | *2025* | [Repo](#)

- Trained a deep learning model to classify skin conditions from photos, served via a Flask REST API, integrated with a React.js frontend surfacing personalised product recommendations.

Stack: Python, Flask, Scikit-learn, React.js, Node.js, Express.js, MongoDB

Women Safety Application – React Native | *2025 – 2026* | [Repo](#)

- Developed a cross-platform SOS mobile app with one-tap real-time GPS alerts to emergency contacts, a Node.js/Express.js backend, and an admin dashboard for live incident monitoring.

Stack: React Native, Expo, Node.js, Express.js, MongoDB

CERTIFICATIONS

Python Programming – Cisco Networking Academy | Oracle Database – Oracle University | MongoDB – MongoDB University
